Response To Questions No. 6

166. Question: How do we reconcile the discrepancy between the utility relocation times described in Tech Spec 2.10 when compared to Appendix U1? There are also discrepancies between Gen Prov 1-07.17 and Tech Spec 2.10.

Response: Updated information relating to the design and construction times for utility relocations for each Utility Owner referenced in Section 2.10.3.10 (Known Utilities) is contained in the respective MOUs which were issued as RFP Appendix U1 pursuant to Addendum #7. Section 2.10 will be revised in Addendum #9 to be consistent with the times in the MOU's.

Technical Specifications Section 2.10 (Utilities) is also being revised in Addendum #9 due to current inconsistencies with the General Provisions Section 1-07.17.

Bob Dyer
